MAINTENANCE GUIDE

Product Range:

SOLID BRASS STAIR RODS & EYES

Material

Solid Brass Grade H/H CZ108 BS2870:EN1652

General:

Immediately after installation and the removal of protective tape, the stair rods should be wiped with a dry, soft cloth to remove any handling marks. These brass stair rods are produced with a highly polished, satin, antique or chrome plated finish. The installed rods should be wiped clean on a daily basis to avoid build up of dust and dirt which may make it more difficult to maintain its appearance.

Polished Finish:

Highly polished brass rods require polishing with a suitable metal polish and a soft cloth in order to maintain their appearance. Make sure that all traces of polish are removed during polishing. Alternatively, rods can be left to age-oxidise for a natural finish.

Satin Finish:

Wipe with a dry cloth or duster. Do not use any liquids on these finishes. To remove scuffs and small scratches, a green Scotch pad can be used, rubbing along the grain of the existing finish.

Antique Finishes:

Antique Brass and Antique Bronze finishes are a chemically applied process and are hand finished with a variance from batch to batch. They are not foot-traffic resistant and are designed to create an aged, unpolished effect. Wipe with a dry cloth or duster. A damp, clean cloth may be used for heavily soiled rods but must be dried immediately.

Chrome Plated Finish:

Buff occasionally with a dry cloth or duster. A damp, clean cloth may be used for heavily soiled profiles but must be dried immediately.

Important:

AVOID CONTACT WITH WATER AND ALL FORMS OF MOISTURE. PROLONGED CONTACT WITH MOISTURE OR CHEMICALS WILL ACCELERATE THE OXIDISATION PROCESS AND LEAVE MARKS THAT ARE DIFFICULT TO REMOVE WITH NORMAL POLISHING METHODS.
DO NOT USE ABRASIVE MATERIALS, CLEANING AGENTS OR MECHANICAL SCRUBBING DEVICES AS THIS WILL DAMAGE THE SURFACE FINISH.
CARE MUST BE TAKEN TO PROTECT ADJOINING CARPET DURING MAINTENANCE.
